

ADVANTAGES

- Small footprint
- Easily upgrade with air treatment options
- Suitable for harsh environments, excluding Offshore
- Option for weather protection
- Self-cleaning cartridge first stage filters with static second stage filters for higher efficiency and low pressure drop
- For dust/snow storm prone areas
- It offers maximum flexibility to adapt your filter solution to changing environmental/operational conditions
- Improves engine efficiency & availability with a wider selection of filters

Application	Arctic environments Desert environments, or areas prone to dust storms Harsh environments
Installation Options	Weather hoods (rain or snow) A droplet separator stage for mist & moisture protection A first stage cartridge pre-filter ; from M6-E12 efficiency A second stage static final filter; from F9 - H13 efficiency Other features can be added depending on the environment, such as an anti-icing/air inlet cooling system, trash or insect screens Can be supplied in painted carbon steel or stainless steel Can be supplied with our patented HemiPleat filters
Comment	Contact your nearest Camfil office for sizing, staging and configurations choice. Ask us for a Life Cycle Cost evaluation based on your site conditions and/or request an on-site evaluation of your site conditions to validate the required level of protection.
